

**IVECO**  
Drive the road of change

New bars and lamps

**Visibility and safety** with style.

**IVECO**  **S-WAY**

**Accessories**  
ENHANCED EXPERIENCE

# New shapes, new lines, but always with IVECO quality.

The new products feature new shapes, new lines and new colours, all to allow for greater customisation. We have expanded our offer to include chrome-plated and polished black bars, with or without LED lighting.

- **Competitively priced.**

- **Easy assembly.**

Most models do not require drilling into the roof panel. Existing holes can be used and the bar anchored onto the sun blind. Lamp assembly is also easier. Thanks to the pre-drilled mounting bar included in the pack, 4 lamps can be installed in just 6 minutes (excluding wiring).

- **Types and dimensions of pre-drilled mounting bars.**

The maximum number of lamps that can be installed on roof bars depends on the length of the pre-drilled mounting bar.

- **TYPE 1:** length of the pre-drilled mounting bar 160 cm or 142 cm (included in the pack).
- **TYPE 2:** the length of the pre-drilled mounting bar 126 cm (included in the pack).
- **TYPE 3:** the length of the pre-drilled mounting bar 102 cm (included in the pack).

- **Lamps.**

The type and specifications of each lamp to be fitted can be found on the following pages. Each pack contains one lamp. Pay careful attention to the maximum number of lamps that can be mounted on each bar.

[Go directly to the lamp selection](#)

[Start by selecting the type of bar](#)

# Twelve available bar types.

The new IVECO bars are designed to enhance your style and can be fitted on all IVECO heavy vehicles from MY19 onwards. They are manufactured using 1.6 mm thick AISI 304 stainless steel and are available in chrome-plated or polished black powder-coated versions, with or without LEDs. Choose the most suitable one for your needs and complete it with the lamps of your choice.
